

Anatomy Review Sheet

Chapter 1

Students should Study to KNOW:

Students should STUDY to know the:

1. Difference between anatomy and physiology
2. Names of the 11 body systems
3. Function of the 11 body system
4. Names of majors organs that comprise (are included in) the body systems
5. Names and location of body cavities
6. Names of organs located in each body cavity
7. Directional terms and how to use each one (proximal, distal, anterior, medial, etc.)
8. Anatomical position (be able to describe)
9. Effects of homeostatic imbalance
10. Mechanism of negative feedback
Examples: (blood glucose levels, hunger, thirst, etc.)
11. Mechanism of positive feedback
Examples of positive feedback (i.e. blood clotting and childbirth)
12. Survival needs
13. Organs located in each quadrant
14. Common names of body landmarks
